End-to-End Sales Analysis Using Power BI

In this project, I built a comprehensive **sales analysis dashboard** using Power BI. The dataset included:

- ✓ Sales Table
- ✓ Product Table
- ✓ Customer Table
- ✓ Stores Table
- ✓ Store Goals Table

✓ Recommendations

Reduce Returns: Address issues with Office 365; enhance support and user guidance.

Target 21–25: Prioritize marketing and offers for this top-performing group.

Product Focus: Promote XBOX; review low performers like Visio and Outlook.

Gender Strategy: Boost female engagement through targeted, inclusive campaigns.

Segment Focus: Strengthen Green/Yellow; improve weak segments.

Pricing: Emphasize \$40–\$70 range; use offers to support other price bands.

📊 Key Insights

1. Sales Performance

Net Sales: \$784K

Returned Sales: \$464K (59.2%) — very high

Sales Goal: \$208K → Significantly exceeded

Returned Units: 9K out of 25K → **Return rate ~36%**

2. Category Performance

Top Sales:

Office 365: \$320K

Power Platform: \$250K

XBOX: \$210K

Top Returns:

Office 365: 8.1K units (53% return rate)

Power Platform: 1.2K

XBOX: 0.1K (very low returns)

3. Customer Demographics

By Gender:

Male: 69% of sales

Female: 31%

By Age:

Highest sales: age 21–25

Age 15–20 is active but has higher return ratio

4. Sales by Segment

Top segments: Green and Yellow

Low-performing: Jade, Royal Blue, Magenta

5. Sales by Price Range

Best-selling: **\$40–\$70** range

<\$40 and >\$70 performed similarly but lower than mid-range
